EASTERN VHF/UHF SOCIETY
SAM HARRIS W1FZJ MEMORIAL WAVEMETER
TRIVIA QUIZ

Beginning with the 1981 conference, the Society conducted an examination of its' membership on matters concerning VHF and higher frequency issues and has continued to do so at each subsequent conference. This examination is traditionally conducted following the Society's annual banquet. The participant registering the highest score receives the Sam Harris W1FZJ Memorial Wavemeter award. The awardee is further assigned the task of drafting and then administering the examination to the membership at our next meeting and by virtue of this responsibility is excused from the examination. The Sam Harris W1FZJ Memorial Wavemeter artifact is presented to the learned member for their safekeeping and display during the following year.

This artifact was recovered during an archeological dig at the ruins of the ancient W1FZJ/KP4 moonbounce site in Puerto Rico. It was refurbished and delivered to the care of your Society in memory of this pioneer. The past award winners are:
